PROFESSIONAL EXPERIENCE

Web Developer, Harvard Extension School, Cambridge MA

Jan 2019 - Now

- Worked with many programming languages and applications including html, css, javascript, node, mysql, react, mongo database, etc. I also have a working and active github account for my projects.
- Worked on a dynamic portfolio webpage that has links to some of my favorite projects.
- Designed a website with ajax call back feature for gif search where you can search for any gif you want
- As a project team of 4, we designed a widget that features 4 APIs - subway schedules, weather, daily news and stocks.
- Designed an online sales application with node and mysql packages.
- Developed a node application that helps spotify songs.
- Visit my portfolio page to see my projects - www.leostino.github.io/professional-portfolio/

Production Tech Support, Entegris, Billerica, MA

July 2016 - Dec 2018

- Tags products with RFID tags and serial numbers and associates each product with its tag in the company's software and database.
- Verifies product visually and takes corrective action when necessary. Ensures product is consistent with established specifications. Escalates quality issues as appropriate. Ensures highest possible product quality and adherence to the Entegris quality system, ISO and/or other standards. Ensures all product is packaged per packaging specifications.
- Performs various operations on products in accordance with the work orders and process record instructions.
- Integrates on all key business processes to influence customer satisfaction, waste elimination, growth, cost effectiveness and product/system quality. Promotes and implements use of continuous improvement tools to eliminate non-value activities. Participates actively in continuous improvement activities such as 6s, Kaizen events, etc.
- Monitors production processes and performs data entry in company's SAP and other applications
